

The **NEW Qualitix® Pipette Tip Program** is all about quality, flexibility and compatibility. These new tips offer accurate liquid delivery in both standard and low protein binding resin, fitting not only Socorex® but all major micropipette brands. Packaging selection (bags, racks and *tipfill* rack filling system), together with a choice of tip styles with and without protection filter offer appreciated versatility. Qualitix® and Socorex® micropipettes are the most perfect match for optimized test results according to international standards.

► Broad compatibility

The Qualitix® tips tightly fit Socorex® pipettes and all major market brands.

► Beveled and fine pointed

Beveled tip end ⓐ greatly reduces sticking of liquid drops. Fine pointed tips ⓑ have a thin and soft end, enabling small liquid volume deposit, thus enhancing reproducibility in repeat pipetting. A long and soft end is typical for gel load tips ⓒ.

► Autoclavability – sterility

All Qualitix® including sterile models, with the exception of filter tips, can be autoclaved at 121°C / 250 °F for 20 minutes.

► Free tip samples

Socorex® provides the possibility to evaluate quality, compatibility and reliability of the Qualitix® program. Free samples are available from local distributors.

A broad tip selection

The various tip styles and packaging options bring an excellent choice of Qualitix® from 10 μ L to 10 mL. Considering regular, sterile or non-sterile versions, gel load, low binding or filtered models, there is always a solution, whatever the application or instrument brand.

Aerosol protection – no contamination

Filter tips include a 10 μ m pore hydrophobic HDPE filter to retain any contaminant, efficiently protecting both pipette and sample. Filter tips are designated with an 'F' at the end of the part number and are available in non-sterile and sterile versions.

Low retention - maximal recovery

Low binding tips are made of silicone-free resin, greatly reducing surface adhesion and providing maximal liquid recovery. Available in 10, 200 and 1000 μL capacities, in sterile and non-sterile racks. Also protease-free certified, they are best suited for proteomic research and accurate handling of viscous liquids.

QUALITIX® LOW BINDING TIP vs REGULAR TIP

Rack filling system

The $tipfill^{TM}$ packs are intended for easy rack loading. A practical and economical solution for any laboratory, limiting work interruption to a minimum. Each 96-tip insert is instantly transferred into an empty rack without risk of contamination. The transfer cover keeps tips clean and prevents wobbling during refilling.

Open tipfill™ box.

2 Lift transfer cover. Tips fully protected.

Osition into empty rack.

4 Push to click.

⑤ Reposition cover.

6 Ready to work.

Application guide

Tip style	Features	Benefits			
Regular tips	Superior quality, optimal and universal pipette fitting.	Common use in daily pipetting with Socorex® and other pipette brands.			
Filter tips	Same as above, includes 10 µm pore size hydrophobic HDPE protection filter.	Efficient protection for both pipette and sample against aerosol contamination.			
Low binding tips	Special material provides for very low surface retention.	Accurate handling of thick, viscous liquids and protein / peptide samples.			
Gel loading tips	Long, thin and soft tip end, universal fitting.	Common use in daily pipetting with Socorex® an other pipette brands. Efficient protection for both pipette and sample against aerosol contamination. Accurate handling of thick, viscous liquids and			

▶ Packaging options

Tips available in bags, hinged lid racks and *tipfill™* rack filling system. Racks have smooth rounded edges and ergonomic snap latch that won't catch gloves. The transparent lid enables instant view of the contents. Empty racks are re-usable with *tipfill™* system.

► Detailed label information

Qualitix® autoclavable resistant labels include volume, catalogue and lot numbers. Sterile products show expiry date as well. Rack labels remain permanently.

► Environmental aspects

Packaging is optimized ensure good protection while using minimal cardboard material. This reduces waste volume as a contribution to environmental care.

► Space reduction

The smart re-closable tipfill™ box uses far less space than corresponding amount of conventional racks, and produces less plastic waste. This has a direct impact on storage requirement, shipping costs and environment.

Superior quality material

Socorex is aiming at providing reliable pipette tips to ensure consistent analytical results. High purity grade and lot-by-lot consistency guaranteed. Product certificate supplied in each pack documents test methods and detection level. Lot specific certificate available from Socorex and DWK Life Sciences.

View certificate

Purity benefits

Feature	Advantage	Regular Qualitix®	Low binding tips	Filter tips
Nuclease-free (DNase and RNase)	Safe handling of samples containing genetic material	•	•	•
Human DNA-free	bioproof purity level for any critical pipetting (PCR, qPCR)			•
Pyrogen-free	Recommended in cell culture laboratories	•	•	•
ATP-free (Adenosin Triphosphate)	Beneficial in accurate measurement of cells or bacteria activity	•	•	•
Heavy metal-free	Adequate for trace analysis	•	•	•
Protease-free	Protection of valuable samples containing peptides and proteins		•	•
Sterility	Preserve sample integrity	• ¹	•1	•

¹ Sterile items only

► First class material

Only virgin, medical grade polypropylene used in tip manufacturing process. Material guaranteed metal-free and non cytotoxic, eliminating possible disturbance.

▶ bioproof level

The Qualitix® line is free of detectable DNase, RNase, Pyrogen (Endotoxins) and ATP. Filter tips are additionally certified free of detectable human DNA and protease.

► Stringent quality controls

Each lot is tested by independent laboratories according to recognized procedures. Sterile products have a Sterility Assurance Level (SAL) of 10⁻⁶ using a continuously audited process.

► Standards and compliance

Qualitix® pipette tips conform to the CE directive IVD 98 / 79 EEC (in vitro diagnostic medical devices).

Products and specifications are subject to change without prior notice.
